Aberdeen Runway Resurfacing Project

Dear Neil

We write in relation to your recently completed material supply contract at Aberdeen Airport. Lagan Construction in conjunction with our Joint Venture partners Ferrovial Agroman have recently completed the resurfacing of the runway and taxiway rehabilitation works ahead of time, under budget and to a high standard. As a key supply chain member we wish to commend Leiths on their major contribution to the success of this project.

Throughout the entire process, from tender to construction, we have found Leiths to be professional, technically very proficient, operate to high standard of quality, health and safety and deliver to agreed programmes.

As Lagan Construction we would be more than happy to work in conjunction with Leiths or to recommend their services to other companies.

Thank you once again on behalf of the entire project team for your part in the successful and safe delivery of this project.

Yours Faithfully

Steven Turner
