

Contract Crushing and Screening

Built on Quality

We operate the largest fleet of mobile crushing and screening equipment in Scotland.

The plant has been carefully selected to ensure maximum production outputs are achieved with the versatility to meet the diverse needs of our business and that of our customers. The plant will process all manner of rock types and can be deployed into recycling operations and in particular demolition contracts.

Contract Crushing and Screening

Built on Quality

With the largest Contract Crushing fleet in Scotland Leiths have the capability to crush most materials and debris produced in modern construction. Bricks, blocks and concrete can be crushed on site and then re-used on site thus cutting cost and environmental impact, as this mitigates the need to remove material from site and import alternatives.

Leiths ability to provide Contract Crushing and Recycling of site materials will help meet many environmental targets and KPIs set by clients. Our Contract Crushing plant is available to hire on an hourly hire or tonnage produced basis. Leiths regularly carry out crushing contracts across the country from the Scottish Highlands to the Borders and beyond.
