

Demolition and Asbestos Removal

Built on Quality

Services include

- Demolition
- Site Clearance
- Asbestos Removal
- Asbestos Testing

Leiths (Scotland) Ltd can offer demolition through our subsidiary Lawrie (Demolition). Demolition offered includes full or partial demolition of all structures, façade retention or soft stripping for refurbishment.

Licensed by the Health and Safety Executive for Asbestos Removal, we can provide surveys to locate the presence and extent of any suspected asbestos containing materials and if located we can sample and analyse suspect materials and if required, remove them.

Lawrie are members of Constructionline, the National Federation of Demolition Contractors, National Demolition Training Group and Achilles.

Demolition and Asbestos Removal

Built on Quality

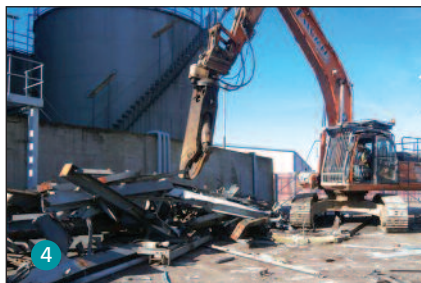

All staff whether Managers, Supervisors or Operatives employed for demolition or asbestos removal are trained to the highest of standards with all holding CSCS, CCDO, CPCS cards or equivalent. Our continuous training programme ensures that all staff are aware of the latest developments in the industry.

Our extensive fleet includes Excavators ranging from 20T to 45T fitted with specialist attachments to provide mechanical separation and rehanding, pulverisator for concrete and rebar separation and a guillotine and cutting attachment for reprocessing of steel.

- 1) Former BP headquarters, Dyce - 6 storey concrete building reduced by 47m high reach machine fitted with hydraulic concrete pulverisator. All materials generated processed to produce 6f2 crushed materials for re-use.
- 2) Ground remediation at Elgin Flood Alleviation to allow for piling to continue.
- 3) Excavator fitted with 360° selector grab used to segregate materials for re-cycle and to load skips with wood, metal etc..
- 4) Excavator fitted with hydraulic shear attachment. Shear replaces the need for hot cutting.
- 5) Ops remediating ground in Aberdeen. Ground was remediated and saved hundreds of tonnes of materials being loaded and hauled considerable distances off site, as contaminated material.
